

# ITK-1075

## Floor Type Tensile Strength Tester

### Uses

This machine is used to test tensile, peeling, shearing for textile, rubber, plastic, synthetic leather, tape, electron and metal,etc, to determine the product or semi-product quality.

### Character

- The appearance uses cold drawing static spraying maps,Concise and easy,multifunction.
- Figure liquid display,can distinguish the tension or pression,easy to read.Three kind unit: N,Kgf,Lbf
- you can read the peak value from the tension and pression direction,and zero clearing aumotically and handle.
- Halt overload funtion.
- Floor type with beautiful structure.

### Accessories

- 1.Suitable Grips that meet customer sample need.
- 2.Special peeling tools for peel test in tape&film industry.
- 3.English operation teach video.

### Specifications

Design Standards	ASTM D903 , GB/T2790/2791/2792 , CNS11888,
Model	ITK-1075
Capacity	500 (10, 20, 50, 100, 200, 500) KG Optional
Unit	Kg、lb、N
Accuracy	± 1%
Motor	1/50,000
Test speed	50~500 mm/min (100, 200, 300, 400, 500) Stepless speed and adjustable
Power	AC 220V,Single phase
Test Stroke	1200mm
Dimension	600x450x1800mm(length*width*height)
Display Panel	Leakage protection、Over-load protection、Emergency stop、Upper and lower limit
Protection	stretcher, air clamp

ITK-1075

Grips(can customize as standard or clients required)
