

Ultrasonic Welding

TWW-003

Hwaraye

Specification

Frequency	: 28KHZ
Horn	: Working Surface Diameter \leq 12mm Aluminum or Titanium
Material	
Power	: 500W
Voltage	: 220V/110V
Generator	: Digital Generator
Tuning	: Auto Tuning
Type	: Cylinder

Applications:

Electronic and electrical appliances, auto parts, clothing and packaging, textile industry, environmental industry, medical equipment, the toy industry, communications equipment and other industries.

Competitive Advantage:

- 1 Suitable for riveting, forming and welding.
- 1 High quality, heavy duty aluminum housing with light weight.
- 1 Automatic amplitude reservation
- 1 Timer-to set the time for welding
- 1 Mobile – can be transported by handle on the generator
- 1 Soft start-reach the maximum power in 105 msec.
