

Film Applicator with Holding Device

LR-6017

Comparing with Automatic Film Applicator , this film applicator uses glass bed (without vacuum holes) as drawdown bed. It's only available for applying on the hard substrate (no need be sucked), such as metal or glass substrate.

- Adjustable variable speed: 2~100mm/s
- High precision linear guide bar and direct current motor without carbon brush. Making the draw down speed more stable.
- Reasonable design bracket, easily and simply operated, and can add any load
- High smooth precision glass drawdown bed for easier cleaning
- Can set the starting point freely, is suitable for different size substrates
- Four types application distance can be selected freely.
- Applicable to all Biugeds different type and size applicators and wire bars

Main Technical Parameters

- Coated base size: 400mm×220mm
- Coating length: 280mm
- Coating speed: 2 ~ 100mm/s CVT
- Loadable weights: 2 pieces, 500g each (1000g or 2000g are optional)
- Motor power: 50W
- Power supply: 220V 50/60Hz
- External dimension: 550×320×340mm (length × width × height)
- Weight: 25Kg
