

LR-6057

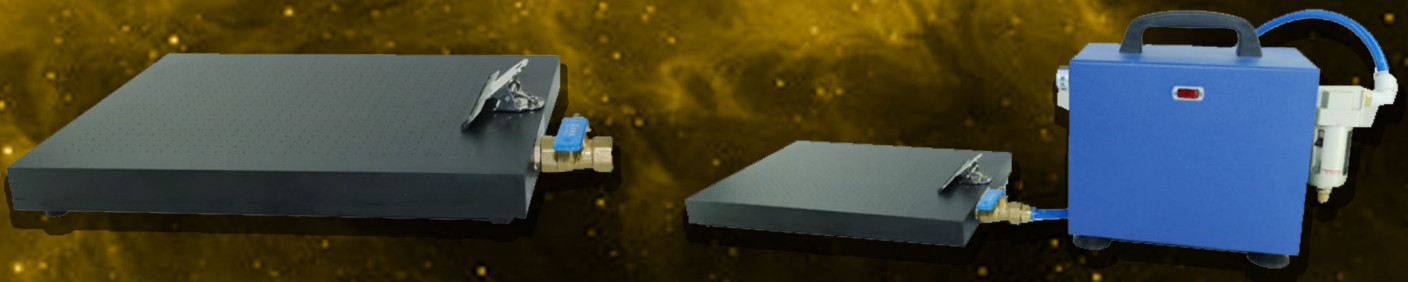

Vacuum Coating Plate

Product description

Vacuum coating plate adopts the principle of vacuum adsorption, the substrate of coating layer preparation is adsorbed on the vacuum coating table flatly, so that the tester can conveniently apply accurate coating film on different substrates, greatly improving the reproducibility of coating film.

Dagda offers two different sizes of vacuum coating table (also can be customized other special size), and are equipped with high quality vacuum pump.

Ordering information:

Type A

vacuum coating table (dimensions: 360 mm 250 mm; Size of the part with holes: 290 mm 190mm)

Type B

vacuum coating table (dimensions 533 mm 340 mm); Size of hole part 460 mm 270mm)
