

Ultrasonic plastic welding machine

JC-4215

Application

specialized for welding ABS,PE,P-C,PS,PVC,PP,ABS and many other materials for sealing products like cell phone case, battery case, charger, U disk, sd card, USB connector, folder and other products

Character

1. frequency adjusting, vibrational automatic compensation circuit.
the digital welding parameter setting
2. high quality piezoelectric ceramic transducer, output strong and stable
3. good quality steel welding horn durable
4. CNC mould holder, screw moving for adjusting level of welding head and mould accurately
5. Nose using gravity casting, CNC machining, high precision. soft start circuit to avoid damage to the mould

Welding Machine

Specification

Model	JC-4215
Working power	4200W
Welding frequency	15khz
Input electric voltage	1phase 220v
Working speed	5000pcs/8 hours as usual
Max welding area	120mm*80mm as usual (depends on welding areas)
Driving system	pneumatic
Air compressor	yes need to work with air compressor
Welding material	PC,PVC,PET,PP and many other plastic material
Level of machine	standard model of ultrasonic series
Weight	80kg
Dimension	height 1600mm * width 800mm * length 1200mm
