

Automatic Inking Ink Proofer

Use

Ink proofing machine is used in offset printing, rotary offset printing, embossing and varnish, accurate, rapid proofing and color matching tools, equipped with ink quantitative instrument, with extremely high repeatability.

Function

Ink proofing machine is used in offset printing, rotary offset printing, embossing and varnish, accurate, rapid proofing and color matching tools, equipped with ink quantitative instrument, with extremely high repeatability.

ITKLR-N003

Specification:

Input voltage: AC220V 50Hz

Machine power: 100W

Color bar area: 46X200mm

Color strip effective area: 40X180mm

Printing area: 60X250mm

Display speed: 60mm/SEC

Suitable for material thickness: 0.05-0.8mm

Uniform speed: 300 RPM

Uniform time: 60 seconds

Specification of aluminum show color wheel: the weight of the roller 67X50mm: 140-145g

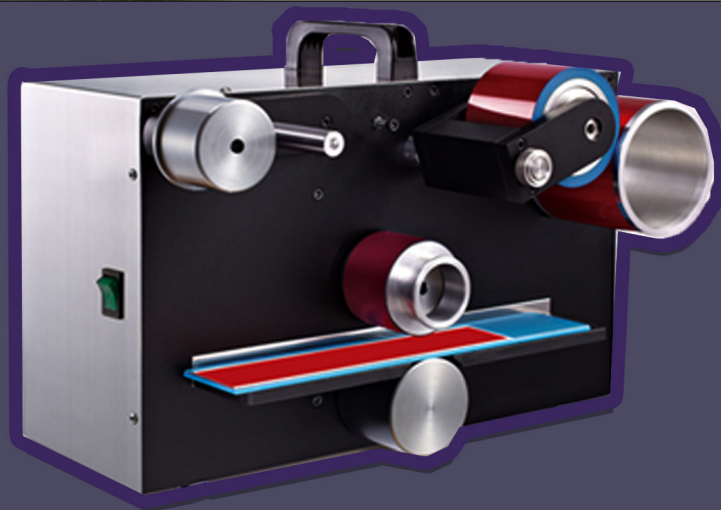

Specification of rubber roller: the range is 85X70mm

Distribution cylinder: the size of the cylinder is 100X100mm

Uniform pressure: automatic

Instrument size: 430X270X230mm

Rubber roller (common ink roller, UV ink rubber roller optional)
