

Gravure Ink Proofer

ITKLR-N004

Advantages of the color display machine:

Use a gravure and a blade for ink.

The circular pressure circular structure is closer to the shape of a gravure press.

The proofing speed is closer to the gravure printing press.

It is more repeatable than using silk.

Printing effect can compare with the effect of gravure printing press.

Convenient operation, automatic positioning, electric pressure.

It is easy to clean water-based water-based ink.

The bar can be customized according to the customer's request, the replacement is simple.

9. Two color samples at one time. The first color sample is for reference (because of the speed of inking and speed).

Specification :

Input voltage: AC220V, 50hz-60hz **machine power:** 150W

Sample pressure: touch screen digital 0-100% fine tuning

Sample speed: touch screen adjustment, 15,20,30,40,50,60,70,80 meters per minute adjustable, or 10 to 130 meters per minute adjustable.

Dimensions: 525X430X280mm

Web version: 80X135mm or 130X135mm

Number of web pages: a gradient version (also can be customized according to the customer's requirements)

Standard: roller circumference 251.3mm roller width 135mm or roller circumference 408.4mm roller width 140mm

40 mu m (78L/CM) 45 mu m (71L/CM) 50 mu m (62L/CM) 55 mu m (58L/CM)

Color bar size: 50X80mm each, a total of 4

Diamond shape, needle Angle 120 degrees, net Angle 60 degrees

Size: 120X330mm (half girth) or 120X656.5mm (perimeter)

Effective area (design area) : 100X200mm or 120X380mm

Paper core: inner diameter 76MM, outer diameter: 95MM

Material diameter: 200MM

Convenient function: automatic switch of white function or low precision color printing

Net weight: 80KG

Application: the gravure sample is suitable for water - based, solvent - based inks, coating coating. Used for color card printing. It is a necessary tool for detecting ink color, concentration, gloss of light oil, VOC detection, color matching of computer and ink comparison.
